

LPN IV Therapy Certification

30-Hour Hybrid Course

Course Information

This is a hybrid course to provide the LPN with knowledge of IV fluid balance, IV medication administration, central venous catheter maintenance, IV legalities with the role of the practical nurse, and IV initiation. This course is designed in a hybrid format that equals 30 hours of study and participation time over four weeks. In addition, a minimum of six hours spent in lab practice time and four hours supervised practice with an approved preceptor.

Students are strongly encouraged to register by Saturday, January 30, 2021 for Early Bird Price of \$475. Registrations after January 30, 2021 will be \$525. If space is available, we will accept registrations until Monday, February 22, 2021. Registration fee includes cost of textbook and lab supplies. Textbooks must be returned upon conclusion of the course. Textbooks can be picked up on the East Grand Forks campus.

Course Requirements

- Students will be required to provide their LPN License to complete the registration process.
- Students will be required to use a computer with internet access to complete the online course.
- Students will be required to attend scheduled lab(s) on the East Grand Forks campus.
- Students will be required to identify a clinical site with an approved clinical preceptor or attend an NCTC lab with faculty/clinical preceptor to complete successful initiation of three IVs.
